Jam Free

Temperature adjustable

80-125 microns film

FUJIPLA Lamipacker LPD2315/LPD3215 is a laminating machine using thermal control system and our patent jam free function. This thermal control mechanism enables you to laminate various films and objects.

Features

LPD2315 A4 can be used for diverse applications as it laminates various sizes of objects, from name card size to A4 size.

LPD3215 A3 can be used for diverse applications as it laminates various sizes of objects, from name card size to A3 size.

Thanks to the thermal control system, temperature is flexibly adjustable, which enables it to laminate various objects and films.

As a result of jam free function, there is less trouble in lamination.

Easy operation is achieved in this model by setting switches, temperature dials and lamps on the front of the machine.

Specifications

Model	FUJI Lamipacker LPD2315	FUJI Lamipacker LPD3215
Item No	LPD2315	LPD3215
Max. Laminating Width	230mm(A4)	335mm(A3)
Max. Laminating Thickness	0.6mm(including film thickness)	
Film Thickness	80-125microns	
Temperature Range	Room temperature, 100°C-135°C(±10°C)	
Laminating Speed	300mm/min.(50Hz)	
Warm-Up Time	Approx.8 min.	
Number of rollers	2	
Others	jam free	
Dimension(WxDxH)	385×167×115mm	500×175×119mm
Attachments	Instruction manual, cleaning paper, 3 lamination films (A4 size)	Instruction manual, cleaning paper, 3 lamination films (A3 size)
Power Source	AC220-240V(50/60Hz)	
Power consumption	400W	696W
Weight	2.5kg	3.7kg
Package size/Weight	425×205×145mm/2.7kg	540×210×150mm/4.0kg
Carton size/Number/Weight	445X440X330mm/4/11.0kg	555X450X190mm/2/8.5kg

*Warm-up time depends on room temperature.

*Specification may be modified without prior notice.

Our patent product.

Effects

As a result of lamination, the efficiency of durability and water resistance is improved and the laminated object is protected from scratches, stains and water.

As laminated objects, such as documents or printed materials, are completely sealed and protected from oxidization of ink, color fade-out or changing colors is prevented.

The printing gets more vivid as lamination process makes surface of the laminated object flat and smooth.

By choosing lamination film, it is also possible to obtain UV cut effect or static-free effect.

Lamination Film

It is recommended to use our genuine FUJIPLA "CP Leaf". Use of other films may cause trouble (e.g. jamming etc.)

Safety Warning

Read the instruction manual thoroughly before operation to avoid danger and failure in the lamination.

In the cases listed below, please stop operation, disconnect the ground connection and contact your FUJIPLA dealer immediately.

-The power supply cord or plug gets unusually hot.

-Strange smell or smoke comes out.

-Water or foreign objects get inside the machine.

Warning and caution signs are omitted in the photographs run on this catalogue.

Specification and appearance of the product may change for improvement reasons without notice.

Maintenance parts for maintenance service are available for a minimum of 5 years after cessation of the manufacture of product.

This catalogue is valid as of November 2004.
